使用 Microsoft Intune 部署 Action1

使用 Microsoft Intune 安裝

本部分提供使用 Microsoft Intune 在 Microsoft 365 中註冊(enrolled)的端點上部署 Action1 代理程式的逐步指南。此部署方法對於實現新設定的端點的管理非常有用,尤其是在沒有本機管 理員權限(local administrator rights)的 Microsoft 365 使用者註冊裝置的情況下。

步驟一:下載 Action1 Agent 從 Action1 控制台下載適用於 Windows 的 Action1 代理程式: 🛆 / Endpoints / Install Agent Free: assess all once + patch 100 forever. For more: Free trial **Getting started with Action1** The first step is to download and install your first Action1 agent - a tiny program that securely connects to Action1 Cloud and allows to manage your endpoint remotely. 1 Download Agent Download Agent or Copy the download URL to open it on another endpoint and initiate the download there. Platform Туре **Delivery options** Windows MSI Download 🛓 Copy URL 📋 Copy URL 📋 🖆 MacOS PKG Download 🕹 2 Install Agent Run the downloaded file to install Action1 Agent. Your firewall must allow outbound TCP connection on port 22543. Waiting for the agent to download... 3 Manage your endpoint Click Start Manage to proceed to managing and viewing details for your endpoint.

步驟二:指派部署目標

預設情況下,所有裝置或所有使用者都用作部署目標。若要將 Action1 代理程式部署到「所有 裝置」或「所有使用者」之外的選定端點或用戶,您應該建立一個專用群組,其中將包含由 Action1 管理的端點。

為此:

- 1. 開啟 Microsoft Intune 管理中心。
- 2. 瀏覽至「群組 Groups,」,選擇「新建群組 New Group」,然後依需求設定其設定。
- 3. 從**「成員資格類型 Membership type」**清單中選擇*「已指派 Assigned」*·然後將相關裝置 或使用者新增為*「成員 Members」*。

app •

步驟三:設定應用程式部署 Configure app deployment

1. 在 Microsoft Intune 管理(Admin)中心中,前往應用程式 |所有應用程式(Apps | All Apps)。

| C C https://intune.microsoft.com/?ref=AdminCenter#view/Microsoft_Intune_DeviceSettings/AppsMenu/~/allApps | | | | | |
|-----------------------------------------------------------------------------------------------------------|-----------------|-----------------------------|---------|--------|--|
| Microsoft Intune admin center | | | | | |
| * | Home > Apps | | | | |
| A Home | Apps All apps | | | | |
| Z Dashboard | | | | | |
| E All services | | 🕂 Add 🕐 Refresh 🏾 🍸 Filter | | | |
| Devices | (i) Overview | | | | |
| Apps | All apps | Search by name or publisher | | | |
| | oppo | Name | ↑↓ Туре | Status | |

2. 按一下新增(Add),然後從應用程式類型清單中選擇業務線應用程式 Line-of-business

| Home Dashboard Al services Al services | Home 2 Ages (Windows 2) Home 2 Ages (Windows 2) Windows (Windows 2) Al ventors Denors Windows ages | | s apps + sist ⊘ keftesh ⊽ Hiter 🐇 topot | | | Select app type Create app App type Serect app type Serect app type | × |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|--------------------------------------------|-------------|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| the second security the point security the points the points the second | | [β] Sauch by ranks or pub Nurw | ti Yee | Sana Wenkon | Asspred | Microsoft Store app (meet) Microsoft Store app (heap) Microsoft Stor Apper Windows 10 and later Windows 10 and later Web Applications Windows Web Inits Other Web Store Ling-Efficialises app (Win2)2 | |

3. 在「應用程式資訊 App Information」步驟中,按一下「選擇應用程式套件檔案 Select app package file」並瀏覽尋找已下載的 Action1 代理檔案。

| Home > Apps Windows > Windows Windows apps > | App package file × |
|------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| Line of business app | App package file * "action1_agert(My_Organization_Defaulty.msi" |
| App information Assignments Assignments Select tile* | Nams: Action 1 Agent Platform: Windows Stee: 5:4: M/IB MAM Enabled: No Execution Context: Per-Machine |
| | ox D |

- 4. 指定應用程式屬性:
 - 1. 輸入名稱、說明和發布者(Name, Description, and Publisher)。
 - 對於應用程式安裝上下文(App install context) · 此範例使用裝置(Device) (使用 Action1 來管理的專用目標端點群組)

注意:如果您已將專用使用者群組配置為目標,則選擇「使用者 User」。

3. 將 "忽略應用程式版本(Ignore app version)" 設為 "Yes" 。

注意:如果此參數設定為Yes,這將指示 Intune 僅在目標上不存在該應用程式時部署該應用程式;如果該應用程式已安裝,則無論其版本如何,它都將保持不變。由於Action1代理程式是透過連接到Action1Cloud 自動更新的,因此它始終具有最新版本,在這種情況下不會被覆寫。

- 4. 在命令列參數中 Command-line arguments, · 輸入:
- /quiet- 無人值守安裝的強制參數
- /norestart- 選項的
- 在命令列參數中,您也可以指定代理安裝日誌的日誌記錄等級和位置。例如:/L*V "c:\action1_agent_install.log" 其中:
- V -詳細日誌記錄級別
- "_c:\action1_agent_install.log_" 日誌檔案的路徑
- 6. 根據需要指定其他屬性。另請參閱 將 Windows 業務線應用程式新增至 Microsoft Intune

| Home > Apps All apps > | |
|-----------------------------------------------------|--------------------------------------------|
| Add App Windows MSI line-of-business app | |
| App information Assignn | nents ③ Review + create |
| Select file * ① | action1_agent(My_Organization_Default).msi |
| Name * 🕕 | Action1 Agent |
| Description * () | Action1 Agent |
| | Edit Description |
| Publisher * ① | Action1 |
| App install context | User Device |
| Ignore app version ① | Yes No |
| Command-line arguments | /quiet /norestart |
| Category 🕕 | 0 selected |

| Notes ① | |
| Logo ① | Select image |

5. 點選查看 + 儲存(Review + save)。

6. 在「**指派 Assignments**」步驟中,導覽至「**必要 Required**」並按一下「**新增群組 Add** group」(建議選項)或使用其他選項指定 Aciont1 代理應用程式部署的目標。

| iome > Apps All apps > | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Add App Vindows MSI line-of-business ap | |
| App information | Assignments ③ Review + create |
| Required 🕠 | |
| Group mode | Group |
| - | |
| + Add group ① + Add all use | Action1 Agent Group + Add all devices |
| Included Add group + Add all use Available for enrolled o Group mode | Action1 Agent Group |
| Included Add group ① + Add all use Available for enrolled o Group mode No assignments | Action1 Agent Group |
| Included Included Add group ① + Add all use Available for enrolled o Group mode No assignments + Add group ① + Add all use | Action 1 Agent Group • Add all devices • vices • Group • · · · · · · · · · · · · · · · · · · |
| Included Add group ① + Add all use Available for enrolled of Group mode No assignments + Add group ① + Add all use Uninstall ① | Action1 Agent Group |
| Included Add group ① + Add all use Available for enrolled of Group mode No assignments + Add group ① + Add all use Uninstall ① Group mode | Action 1 Agent Group |

- + Add group () + Add all users () + Add all devices ()
- 注意:目標只能包含在一個分配類別中(註冊設備必需或可用)。

步驟四:驗證部署狀態

查看並儲存所有設定後,等待 Action1 代理程式部署完成。

然後您可以轉到應用程式 |視窗 | Windows 應用程式(Apps | Windows | Windows apps)並選擇您已部署的 Action1 代理應用程式。展開監視器 |設備安裝狀態(Monitor | Device install status)以查看部署狀態 - 應該為目標設備*安裝。*

| «. | Home > Action1 Agent | | | | | |
